CUTTING AND WELDING EQUIPMENT EXPO

International Exhibition on Cutting & Welding Equipment & Technology

29 - 31 Aug. 2018 | Pragati Maidan, New Delhi, INDIA

www.cweonline.com

Few Words from Mr. Ajay Trikha - National Sales Manager - India - DINSE G.M.B.H.

DINSE GmbH with its employees in Germany, Turkey, USA, India, China, Poland, Russia and Scandinavia as well as worldwide sales partners is one of the leading developers and manufacturers of systems for manual, robot and automatic welding. From standard to individual manufacturing in lot size 1, the DINSE portfolio includes a wide range of premium solutions. Whether for MIG/MAG, TIG or LASER welding and brazing, DINSE offers technologically sophisticated systems from a single source - from the modular power source to the highly precise wire feed to the individually developed torch set. DINSE is convinced of a service and customer orientated philosophy and is committed to achieving the highest level of customer satisfaction by developing and providing solutions for their individual requirements, producing high quality products and services, delivering on time, and striving to improve continuously. A strong, experienced sales team and a tailor-made maintenance concept secure the long-term reliability of DINSE systems. In case problems arise, the experts are directly on side to find a solution. With "Made in Germany" DINSE meets high quality standards of all products. Through the modern and efficient manufacturing processes in its plant in Germany, the company ensures an important competitive advantage.

The quality of welding has direct impact on the quality and the outcome of the final product. It is a decisive and crucial economic factor.

The company strongly benefits from international expansion. Since a couple of years, DINSE records steady growth in the Indian market, which is similar to the development it has shown in the Chinese market. Vehicle construction, ship building, machine building, bridge construction, systems engineering or fabrication of medical devices could not be realized without welding. It is one of the most critical operations of any manufacturing process. The quality of welding has direct impact on the quality and the outcome of the final product. It is a decisive and crucial economic factor.

Speed up your working procedures with Dinse Welding Device

DINSE focusses on automation. With automatic welding, companies are able to measurably increase their productivity and process accuracy. Robotic systems, equipped with DINSE welding devices, significantly speed up working procedures and guarantee maximum reproducibility. Also in India the number of productions plants that are gradually converting from manual to automatic welding is dramatically increasing. It is predicted, that in 2019, at least 2000 welding robots will enter the Indian market. The challenge is to produce work-pieces at a faster rate, at lower costs and at higher quality. DINSE has a core competency in automation. There is a big number of global players who trust in DINSE technology, which is constantly being developed and expanded. With the upcoming technologies, but also makes them feel attracted towards welding as a profession for their living.

Business opportunities at CWE 2018

CWE provides opportunities and chances to meet and get in touch with partners, customers, industries and possible new potential customers.
